

# Family Support

*One-on-one support for all children, families and carers living with a disability*

PlayTogether provides free direct one-on-one support for all children, families and carers living with a disability, developmental delay or medical concern to join, participate and feel welcomed in a community playgroup.

A dedicated staff member will assist you to locate a welcoming and supportive playgroup and attend with you on your first few visits.

Assistance will also be provided to the playgroup to ensure that individual needs are understood, welcomed, and can be accommodated, through the provision of training and supplying relevant resources, communication aids and information to assist all playgroup families to understand and accept differences within their community.

On going support is available to ensure that families and children gain the maximum benefits from attending playgroup.
