

# PlayTogether Resource Kits and Visual Aids

A variety of resources to bring families together through play

These kits are designed to support children with Autism Spectrum Disorder and developmental delays to play, participate and socialise in playgroups.

The kits contain information, resources and play activities to help scaffold children's development and to support their learning and participation.

Also included are visual cue card kits to aid in communication, demonstrate routines and are provided free to all community playgroups that successfully complete the PlayTogether program.

*(Please note contents of resource kits may vary due to supply constraints)*
