

# Watercolour Murals

## Spray the world with colour!

Art activities inspire children and provide them with opportunities to use their imagination, hone their skills and express themselves. Being creative gives children the chance to make choices and decisions of their own.

### What you need...

- Paint
- Spray bottles
- Pegs
- String
- Old white sheet

### What to do:

- 1. Prepare the paint:** Water down your desired colours. The contents will need to be watered down to come out evenly through the sprayers. Pour into spray bottles.
- 2. Prepare the fabric:** Hang the fabric on to a wall or from a clothes line. You could also lay the fabric over a table or directly onto the ground on top of plastic. It will get messy!
- 3. Time to get creative!** Give each child a spray bottle and let them spray shapes and patterns onto the sheet.

### Inspiration

Once the artwork is dry, repurpose it in a creative way

Create your own backyard photo booth and use the artwork as an interesting backdrop

If the fabric sheet is big enough, use it to construct a cubby house
